Subject RE: Fw: revised OSR/Park City memo

We do not have this, but it looks good to us . . . Is there a signed  
version we can get a copy of?

Thanks Kevin, I thought the meeting went well also. I think we are on  
track now to have UPCM working at Richardson by this spring. Here is  
the last draft of the OSR Memo. It looks like it did get sent out last  
year, so maybe you do have the correct version. Let me know if you need  
anything else.

Subject: revised  
OSR/Park City memo

Met with Terry today, and he advised that both Peter and Tom would be more comfortable concurring on a memo that was more succinct, and only hit on the driving factor for whether this action met the on-site definition. I cut the original down to something that I think will work - please review and let me know if I hit the mark. Then I will route hard copy. We plan to include a version of the previous memo in the Admin Record for the Site, but without concurrences. We believe it contains important information on our decision that may be important to the public should the decision be questioned. Thanks. Jim
